Dr. Dominik Hezel
Goethe-Universität Frankfurt
Altenhöferallee 1
60438 Frankfurt am Main, Germany

Dear Dominik,

Thank you for providing information about the OneGeochemistry initiative and for participating in the Meteoritical Society Council meeting on 21 March 2023. At the meeting, the Meteoritical Society Council voted to endorse the goals of the OneGeochemistry initiative, and this letter documents that support. The Meteoritical Society supports and endorses the initiative's goals of developing and promoting international standards that make high-quality, highly-trusted geochemical and cosmochemical data findable and accessible online. The Meteoritical Society recognizes the value of having these documented data more easily accessible to aid in our members' research relating to the study of meteorites, asteroids, comets, natural satellites, planets, impact craters, and solar system origins. We look forward to the progress of OneGeochemistry and to being involved in future discussions.

Sincerely,

Nancy Chabot
President, The Meteoritical Society
